50cc Four Stroke Restriction

Please refer to the notes about the legal implications of de-restricting a moped.

Piaggio do not advocate changing the restriction on any 50cc machine that may be used on public roads.

Remember that if a Piaggio, Gilera or Vespa 50cc moped is de-restricted it will almost certainly be technically illegal. It will not conform to Motorcycle legislation but it did conform to Moped legislation.

The main restriction on the 50 cc four stroke engine is electronic. There is no restriction in the exhaust pipe.

1. Make a 3mm deep cut with a hacksaw in the position shown. Then fill the slot with silicon.
2. Remove the spacer washer between the front pulley halves.
3. Fit carburettor main jet size #78. Part number 969622
